

"With the new Tama Pro-Tec 3600m net, I can now wrap more bales without having to load a new roll of net, and the quality and consistency of the Tama Protec 3600m is as I have always been used to."

Mark Haques, Jarretts Farm, Hailsham, Sussex

"Thanks to my Tama Pro-Tec, I spend less time to do my bales with a perfect result, and it is easier for me to store them."

M. TRAVEST, dans l'Ouest de la France

"The change to the new 3600 metre netwrap technology gave me only advantages. The net is running without any trouble, we have less downtime and at the end, the price per metre is more competitive."

Bernd Knott aus Kempen, Germany

TamaNet EDGE TO EDGE™

3600 M & 2600 M

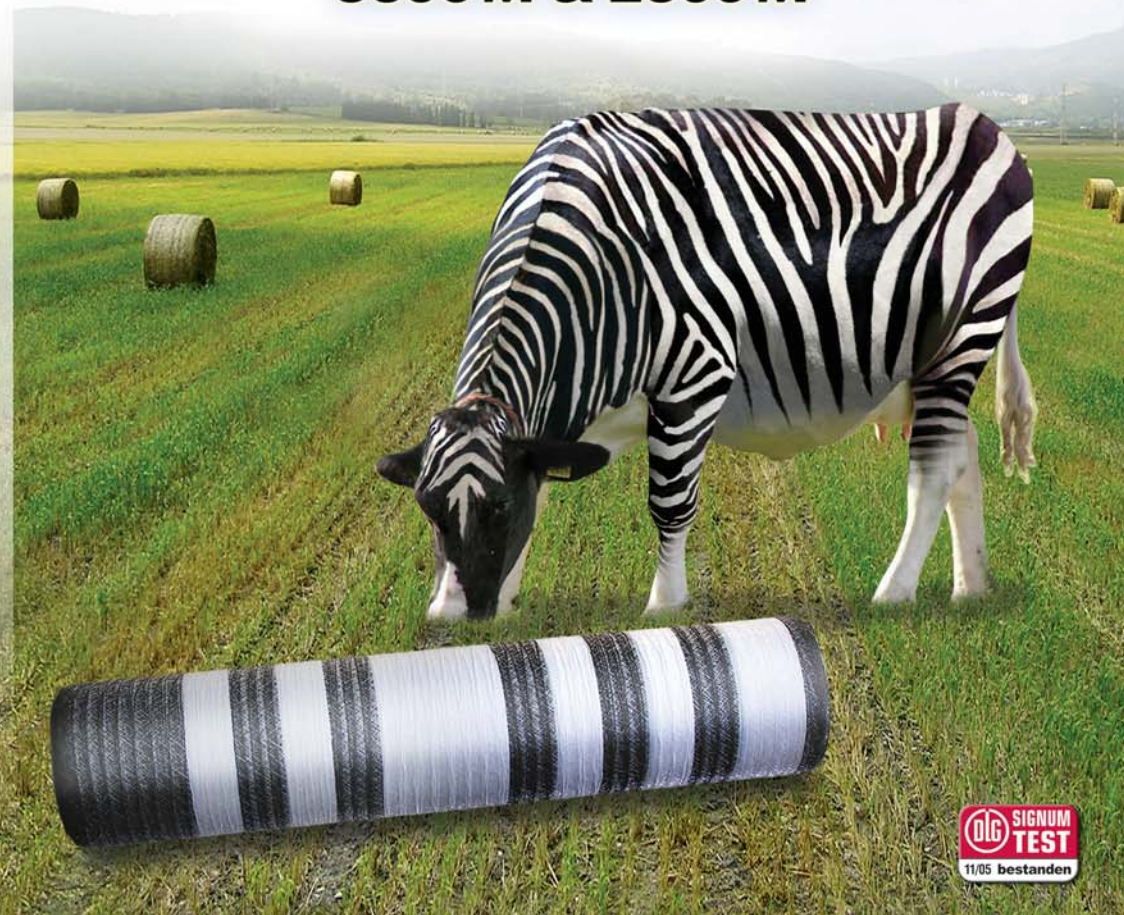

Can we help ...?

Most problems encountered with all makes of crop packaging are from faults in the baling or bale wrapping 'system', often as a result of incorrect operation or handling.

Let Tama CE help you with free 'troubleshooting' advice and assistance, to increase efficiency and reduce costly 'down-time' when baling and bale wrapping.

- Are your netwrap bales bursting?
- Does your stretchfilm break when wrapping?
- Are your silage bales splitting?
- Are your silage bales mouldy when opened ?

For troubleshooting tips visit www.croppackaging.com or fax to: +49 251 280 5850

Stripes mean quality.
Tama Zebra System™ – all benefits knitted together.

20% more perfect bales per roll

Cost per bale like this

or

Cost per bale like this

Consider carefully the value of your bales and the work involved in making them.

A cheaper priced roll may not only be more expensive per bale, it will not offer the level of crop protection you are able to achieve with Pro-Tec.

Tama Zebra® System all benefits knitted together

Tama's 'Zebra® System' is an easy identification for the highest quality net available on the market.
