TamaNet Edge to Edge 3600m the industry 'benchmark' in PREMIUM netwrap.

With 20% MORE netwrap on the roll than 'standard' 3000m net, TamaNet Edge to Edge 3600m brings significant efficiencies to the baling operation and produces consistently fully covered bales, so increasing crop and fodder values.

## Zebra System

An easy identification for simple end-user handling benefit. The asymmetrical striping pattern across the width of the net gives the operator a very clear 'left / right' indicator when loading the net into the baler.

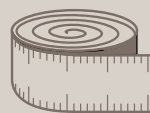

## End Warning

Indicates to the operator that the end of the roll is approaching, avoiding the risk of making a bale with insufficient net to wrap it.

## Roll Carry Handles

For easier and safer handling. (Patent pending)

## Length

Every roll contains the guaranteed stated length, not a "plus- or- minus" average.
