

“A full days'
baling on my shoulder...”

TamaNet™ EDGE to EDGE™

4500m

Edge to Edge 4500m - longest netwrap in the world, able to make over 500 bales from one roll*

- ✓ Maximise your baler's output by baling for longer without stopping to re-load.
- ✓ 4500m in one roll, means less roll handling to re-load for the same bale count, with 50% more net on every roll than 'standard' 3000m netwrap, giving more output from the fully loaded baler.
- ✓ Longer length rolls takes up less storage space for your annual netwrap needs and reduces waste packaging.
- ✓ Edge to Edge 4500 increases the performance of all makes and models of round baler
- ✓ Rolls are packaged 28 per pallet

TamaNet Edge to Edge 4500m... it's like medicine for the baler
