

Make the right choice  
for your baling needs...

Baler type

Crop type

Baling and crop  
conditions

**YOUR BEST CHOICE**

## LSB Max

Pack length 3200m

**Maximum twine for the money**

Offering more meters per spool than any other big baler twine, LSB Max is designed for lower density bales such as hay for livestock.

**LOW**

## LSB Long

Pack length 3000m

**Standard-density solution that goes a long way**

A cost-efficient solution for forage baling, LSB Long is similar to Type 150 twine.

**STANDARD**

## LSB Power

Pack length 2800m

**Powerful and versatile for a perfect fit**

Designed for all baler densities, LSB Power offers the same resistance and performance as Type 130 twine.

## LSB Power XL

Spool length 1650m

Providing the same performance as LSB Power, LSB Power XL comes in a tall, single spool.

**HIGH**

## HD Extra

Pack length 2600m

**Extra length for extra density**

A high-density solution designed for difficult crops - such as barley straw - under harsh conditions. HD Extra is a cost-efficient twine with the same performance as Type 110 twine.

**VERY HIGH**

## HD Prime

Pack length 2200m

**Prime performance in extreme conditions**

Tama's strongest twine, HD Prime ensures reliable and consistent performance under the most challenging conditions.

**EXTREME**

## TamaTwine+ Features

Extra pack length for higher output, better efficiency and less waste

Unrivalled flexibility, strength and performance for 100% reliable tight knots

Uniform spool shape for trouble-free baling

Only range of big baler twine fully validated by all major baler producers for greater compatibility

Reliable and consistent non-stop baling for greater peace of mind

## Our range of TamaTwine+ solutions for large-square baling is designed to meet your specific needs.

Whether you require the strongest twine for demanding conditions or the longest pack length for lower densities, TamaTwine+ is the perfect solution for you, ensuring high performance each and every time.
